Coaching Services

If you prefer to learn the step-by-step approach to self-publishing your work, we can help. We will teach you and advise you on how to go through the self-publishing process. We will guide you on the best options for your work, right from choosing a title, through to the final product, which is a published ebook or print book.

This option is particularly suitable for writers who wish to publish more than one book in the near future. If you've got several manuscripts or you're writing a series, and you need more than a one-off publishing package, we recommend a coaching plan for you.
